--

Oracle Battery warrants to the original purchaser of the SLA / AGM type of Valve Regulated Lead Acid batteries in above referenced series that said batteries will be free of defects in material and workmanship for the period specified above according to rated capacity range, commencing on the date stamped or customer purchase date on original invoice verifiable by Manufacturer's date code on the lid of batteries. Oracle Battery must be notified immediately upon suspicion of any possible defects **within 30 days** after receiving batteries or **within 30 days** after battery failure because of manufacturing defect only and be given the authority to inspect any applications or installations.

If Oracle Battery determines the batteries to be defective due to material or workmanship, it will repair or replace them, at its option, without charge.

A battery will not be considered defective unless it fails to deliver 80% or less of its rated capacity during claimed warranty period.

This is in lieu of all other warranties, expressed or implied, including any warranties which extend beyond the description of the face hereof. In no event shall Oracle Battery be liable for labor, consequential, or incidental losses or damages. The repaired or replacement battery shall complete the remaining portion of the warranty for the original battery.

- 9) Batteries or systems shall be provided with a freshening charge every 5-6 months, while in storage, prior to final installation. Storage: a dry area with ambient temperature no higher than 25°C (77°F) is required for full life optimization.
- 10) Warranty only applies to batteries used in the United States.
