

DC110-12 12V 110Ah

Sealed Lead Acid AGM Battery

Features

DC Extreme Cycling Series:

- Designed for long life in high cycling applications where battery is required to discharge or power and operate the application on a routine basis.
- Proprietary precious metal additives are blended into the grid materials and refined (4BS) active material to optimize the structure increasing cycle-life, and reducing internal resistance. This makes the batteries cycle longer and charge better and faster, while extending overall life.
- 7-10 year service life in standby applications at 25° C temperatures.
- Cycles over 500 times at 60% depth of discharge yet will perform equally well in standby and other applications where both conditions are required.
- Valve Regulated Lead Acid (VRLA), Absorbent Glass Mat (AGM) Technology Safe operation in any position
- Lead-calcium alloy grids and the use of high purity virgin lead
- Externally sealed Flame retardant ABS case and cover to UL94-HB specifications
- UL recognized (UR) as a component in UL approved equipment installations under File number MH46202
- Classified as non-spillable status for transportation making it non-hazardous for normal transportation processes. Approved for transport by air. Fulfills US D.O.T., I.A.T.A., F.A.A., C.A.B. handling and shipping requirements

Specification

Cell per unit	6	Ambient Temperature		
Nominal Voltage (V)	12	Charge 0°C (32°F) to 40°C (104°F)		
Nominal Capacity (Ah)	110Ah @ 20 ho <mark>ur rat</mark> e to 1.75vpc	Discharge -15°C (5°F) to 50°C (122°F)		
Weight	Approx 31.5kg (69.44lbs.)	Storage -1 <mark>5°C (5</mark> °F) to 40°C (104°F)		
Internal Resistance (1KHz)	≤5mΩ	Max Charge C <mark>urren</mark> t		
Max Discharge Current (5s)	1000A (5s)	Max charge c <mark>urren</mark> t 33A		
Battery Life	ife Stand by: 7~1 <mark>0 yea</mark> rs Cycle use : Charge voltage: 14.4 t			
Terminal Type	NB(F16)/IT(F8)	Stand by: Charge voltage: 13.5 to 13.8V		
Container Material	ABS 94-HB flame retardant case (94V-0 Optional)
