

DC100-12 12V 100Ah

Sealed Lead Acid AGM Battery

Features

DC Extreme Cycling Series:

- Designed for long life in high cycling applications where battery is required to discharge or power and operate the application on a routine basis.
- Proprietary precious metal additives are blended into the grid materials and refined (4BS) active material to optimize the structure increasing cycle-life, and reducing internal resistance. This makes the batteries cycle longer and charge better and faster, while extending overall life.
- 7-10 year service life in standby applications at 25° C temperatures.
- Cycles over 500 times at 60% depth of discharge yet will perform equally well in standby and other applications where both conditions are required.
- Valve Regulated Lead Acid (VRLA), Absorbent Glass Mat (AGM) Technology Safe operation in any position
- Lead-calcium alloy grids and the use of 99.9% high purity virgin lead
- Externally sealed Flame retardant ABS case and cover to UL94-HB specifications
- UL recognized (UR) as a component in UL approved equipment installations under File number MH 61846
- Classified as non-spillable status for transportation making it non-hazardous for normal transportation processes. Approved for transport by air. Fulfills US D.O.T., I.A.T.A., F.A.A., C.A.B. handling and shipping requirements

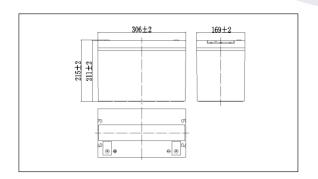

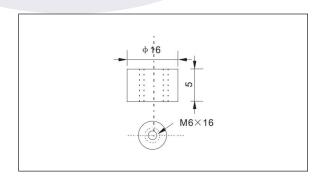

Cell per unit	6	Ambient Temperature			
Nominal Voltage (V)	12	Charge 0°C (32°F) to 40°C (104°F)			
Nominal Capacity (Ah)	100Ah @ 20 ho <mark>ur rat</mark> e to 1.75vpc	Discharge -15°C (5°F) to 50°C (122°F)			
Weight	Approx 28.5kg (62.8lbs)	Storage -1 <mark>5°C (5</mark> °F) to 40°C (104°F)			
Internal Resistance (1KHz)	≤5mΩ	Max Charge C <mark>urren</mark> t			
Max Discharge Current (5s)	800A (5s)	Max charge c <mark>urren</mark> t 30A			
Battery Life	Stand by : 7~1 <mark>0 yea</mark> rs	Cycle use: Charge voltage: 14.4 to 15.0V			
Terminal Type	M6 Insert Terminal Stand by: Charge voltage: 13.5 to				
Container Material	ABS 94-HB flame retardant case
